

COMPRESSORS

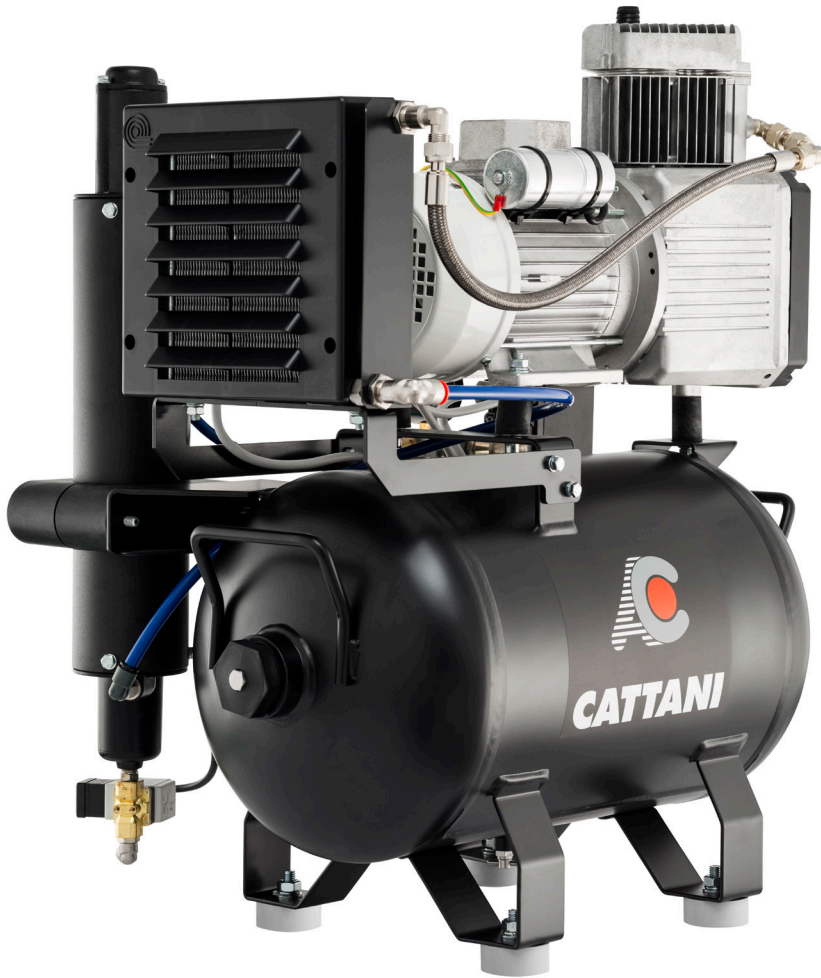

HIGH PERFORMANCE
AND CONSISTENT
DELIVERY OF CLEAN,
DRY, OIL FREE, AND
HYGIENIC AIR.

Cattani manufactures a vast range of compressors in varying sizes and configurations so you can be sure there is a compressor to suit your practice requirements.

For 1-24 Simultaneous Users

We offer solutions for a single chair, right through to hospital and university size applications. The superior design, mechanical precision, and robust components, results allow all Cattani Compressor systems to be backed by a 7-year parts and labour warranty.

FEATURES/SPECIFICATIONS

DRY AIR

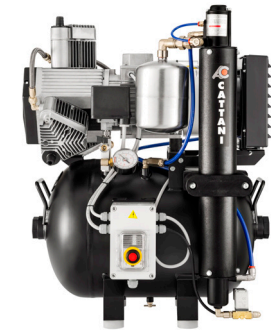

OIL FREE

Oil Free/Dry Air

Cattani Compressors deliver high performance and consistently deliver clean, dry, oil-free, hygienic air.

Clean dry air not only protects your patients and the procedures you perform for them, but also your valuable equipment

Performance

Performance is an important factor in piece of crucial equipment.

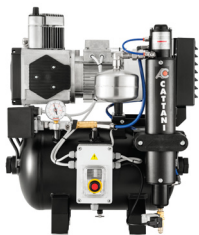

To make a direct brand comparison, it is wise to compare prices versus the compressors air output (l/min at 5-bar pressure) for each brand. Compressors with a lower purchase price can actually be less attractive when output performance is compared.

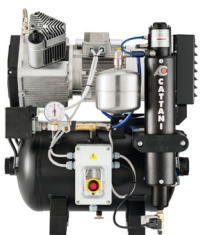

Acoustic

In many clinic layouts, the plant room can be in close vicinity to treatment and staff rooms. To improve the comfort of your patients and staff, Cattani offer a selection of sound reduction solutions, some of which are almost silent.
